

Institute of Clinical Laboratory Sciences  
Silliman University  
Dumaguete City

December 19, 2022

Dr. Sarah Talla  
City Health Department Head  
Santa Catalina Street, Dumaguete City

Dear Dr, Talla:

Good day!

We are second year Medical Technology students from Silliman University, under the Institute of Clinical Laboratory Sciences department. We are conducting a Management Program titled: "Project Tambayayong" that aims to inform and educate the general public on the importance of vaccines in fighting against certain diseases.

In line with this, one of the goals in our organization is to encourage medical physicians and other medical personnel to serve in rural areas, and the objective for this is to provide enough incentives and safety insurance for medical workers serving in the far-flung areas of the Philippines. We are writing to you in hopes that you might grant our request for additional benefits for the health workers. We believe that this will not only make them be more motivated to stay in their localities and serve the people but will also assure them that they are not on their own during unexpected incidents while on duty.

We are hoping for a favorable response regarding this matter. Thank you and may God bless you.

Respectfully yours,  
Lihok PH
