

Name: Bdelle Flev S. Fajardo	Date: 02/05/2023
Section: MT 14 - E	Title: What is an Information System?

Information Systems make delivery services of information much easier through its multiple connections of network. It makes gathering information through recording possible which helps in the planning, managing and processing of its outcome through different networks in order to have an accessible and faster dissemination of the data (Salleh, 2014). It makes use hardwares and softwares like online sites, laptops and smartphones.
